RS-2

MADE BY SOUND ENGINEERS FOR SOUND ENGINEERS

HUM Audio Devices RS-2 is extraordinary, complete recording system with sound and features never before found in any of the top class ribbon mics. Huge, larger than life sound with a lot of depth and details, at the same time preserves classic ribbon sound flavour so much beloved by musicians and engineers.

RS-2 Stereo Ribbon Recording System components:

RS-2 Stereo/M-S Microphone
RS-2 Remote Control Unit
RS-2 Power Supply Unit
Custom made cables (remote, psu, mains)
Mic head dust protection cover
Flight case

Main Features:

- **Active and Passive** mode
- High End, discrete **class-A mic preamps** built into mic body
- Custom made **1,8 micron** aluminium foil ribbon motors
- **Remote control system** gives access to all functions via single XLR cable
- Switchable **Low Cut Filter** (50Hz, 80Hz and 120Hz)
- **Air Boost** mode gives you very smooth Pultec style HF boost
- Transformer based **M/S matrix**
- **Phase Invert mode** for both mic channels simultaneously
- Very useful **DIMM** option protects speakers during mic positioning
- **Rotable mic head** for fast change between L/R to M/S position
- High gain and **huge headroom** - no worry about high source SPL
- **Dual anti-vibration system** (external and internal)
- Custom made **signal and power cables**
- **Lundahl** mic and line output **transformers**
- Extremely **short signal patch**
- Audiophile quality **selected components**
- No electrolytic capacitors in signal patch
