

Each N-Trophy's bay has the same width, so for other sizes please add/subtract 570.3mm:

- 8 channels: 1200.6 mm
- 16 channels: 1770.9 mm
- 24 channels: 2341.2 mm
- 32 channels: 2911.5 mm
- 40 channels: 3481.8 mm
- 48 channels: 4052.1 mm
- 56 channels: 4622.4 mm
- 64 channels: 5192.7 mm

Internal patchbay: additional 570.3mm

* Height is approximate, as legs are adjustable.

Keyboard space: 422 x 138.6 mm
(ideal for current Mac wireless keys.
For PC it is possible to fit Logitech MX Keys.)

Bottom of the N-Trophy is flat, so it is possible to put the console without legs on a standard desk/table.

Group faders and mouse place are user-swappable between left and right positions in the console frame. This feature is provided especially for left-handed artists.

User can order empty bays with dummy channels, then add single/multiple channels later. It is possible to join N-Trophy's bays in a custom order. Additional bays can be also added left/right according to the user's needs. Please agree with the user the way he/she wants to join/expand the console.
